

A young woman with dark hair, wearing a white lab coat, is smiling broadly and looking upwards and to the right. Her right hand is raised near her chin. The image is framed by a large, stylized blue and grey wave graphic that curves around her.

*Beautiful smiles are  
Created here.*

Life is Better with  
A Smile You Love

## About us

Our philosophy is driven by the belief in the importance of an open and explicit exchange of information between the patient and the healthcare provider. We want to gain insight into your requirements while we help you thoroughly understand the treatment modalities available. Our holistic approach allows us to tailor make the treatment plan to suit your requirements, whilst permitting you to make an informed decision.

**Service is a result of the amalgamation of the following quintessential ideals:**

- Exceptional communication regarding your dental needs
- Painless dentistry – comfort during treatment is a rule, not an exception

## Dr. Manish Agrawal

Consultant Prosthodontist and Implantologist

Dr. Manish Agrawal graduated from Nair Dental College & Hospital, Mumbai and proceeded to complete his masters in Prosthodontia from Government Dental College and Hospital, Mumbai.

A skilled Prosthodontist, he is known for his clinical acumen and his patient-centric approach. Not only does he provide technically exceptional treatment to his patients, his ability to put them at ease on the dental chair allows for a comforting doctor-patient relationship, which is of utmost importance in the field of dentistry.

He remains abreast with the latest developments in the field of Prosthodontics by attending various conferences and hands-on courses. Additionally, he is actively involved in research and has several publications to his credit. He has a flair for teaching, lecturing and conducting courses for dentists in addition to teaching dental students.

## Dr. Kavita Maheshwari

Consultant Dental Surgeon

Dr. Kavita Maheshwari is a skilled dental surgeon with 13 years of clinical experience. She graduated from Government Dental College, Mumbai and went on to do an advanced course in aesthetic bonding. She is also a certified dentist for Inman aligners.

Gentle with child and adult patients alike, her motto of creating patients comfort underlines all her work. Her affable demeanor allows patients to clarify all their doubts without any hesitation, resulting in a calm, comfortable working environment.

## Our Services

At Smile Dental Studio, we know that a healthy, beautiful smile can boost your confidence and give you a sense of well-being. We also understand that your time and convenience is very important.

### Braces

Malaligned teeth or an improper bite can not only detract from a person's smile, but can also lead to tooth decay, gum disease and eventually early tooth loss.

#### Types of Braces

- Standard Braces
- Clear Braces
- Invisible Braces
- Colourful Braces

### Pediatric and Preventive Dentistry

All procedures for child dental patients such as fillings, cleanups and extractions are done keeping in mind the child's coping abilities. Additionally, we recommend sealants where required. Sealants are a coating applied onto the chewing surfaces of the back teeth that prevent cavities on these surfaces.

## Restorative Dentistry

Restorative dentistry is the art and science of treating decayed or missing teeth and the surrounding soft tissues to bring them back to their original physical form and function, giving you a healthy mouth.

#### Types of Restorations

- Fillings-Tooth/Composite Fillings
- Bridges/Fixed Bridges
- Implants and Partial Dentures

## Root Canal Treatment

Root canal treatment is recommended when decay has reached the nerve of the tooth. It is in the best interest of the patient to save a tooth with root canal treatment rather than having it extracted and replaced with bridgework or implants, which are more expensive treatment options.

Root canal treatment involves removal of the diseased or dead tissue from the tooth's nerve space and replacement with an inert material after thorough disinfection.

## Gum Treatments

Diseases which involve the supporting structures of the teeth are the leading causes of tooth loss in adults. Fortunately, early detection and treatment of gum disease makes it possible for most people to retain teeth for a lifetime.

#### Types of Gum Treatments

- Scaling
- Gingivectomy
- Flap Surgery

## Extractions

A tooth extraction is the removal of the tooth from the mouth.

## Full Mouth Rehabilitation

Full Mouth Rehabilitation deals with the complex science of treating a mutilated dentition. It involves treatment of many or all teeth present in the mouth in such a way that they can function in harmony with the surrounding muscles and the jaw joint. Dr. Manish Agrawal has a special understanding of the techniques involved in Full Mouth Rehabilitation since he delved into its depths whilst acquiring his Masters degree in Prosthetic Dentistry. As a result of the vigorous training in the subsequent years of experience, he and his trained team at Smile Dental Studio are able to deliver perfect results in even the most complex full-mouth cases.

## Smile Make Over

Your smile is the first thing people notice about you. It is an invaluable asset that can alter lives. A bright and beautiful smile can disarm a tense confrontation or warm the hearts of the people around you.

Cosmetic Dentistry has advanced by leaps and bounds and is today able to give you the smile you have always desired, thus enhancing your appearance and boosting your confidence.

- Whiten Stained or Discolored Teeth
- Fill Gaps Between Teeth
- Straighten Crooked Teeth
- Correct a "Gummy" Smile
- Restore Chipped or Broken Teeth
- Replace Missing Teeth
